Forward Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Fund. Forward looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Fund believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward looking information is not exhaustive, and reference should be made to the other risks discussed in the Fund's filings with Canadian securities regulatory authorities. The forward looking information is given as of the date of this Management Report of Fund Performance, and the Fund undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion of Fund Performance

INVESTMENT OBJECTIVES AND STRATEGIES

The Fund's investment objective is primarily to achieve capital appreciation through investment in a diversified portfolio of equity securities of Resource Issuers engaged in oil and gas or mining exploration, development or production or other forms of energy production, pulp and paper, forestry industries, or energy product and related resource businesses, such as pipeline or services companies and utilities. The Investment Advisor, Front Street Investment Management Inc., will assist the Fund in selecting investments in common shares and other securities of Resource Issuers, including junior Resource Issuers, in accordance with the investment strategies and guidelines outlined herein, with the objective of achieving capital appreciation for the Fund's securityholders. Such investments may include short selling of securities which the Investment Advisor believes are overvalued.

The Investment Advisor may also consider non-investment factors such as cash flow and liquidity requirements, hold periods and restrictions, risk factors, stop-loss containment and tax efficient distributions.

The Fund's investment strategy entails initially investing in shares of Resource Issuers engaged in oil and gas or mining exploration, development or production or energy production, including alternative energy production such as from wind, and that (i) have experienced management; (ii) have a strong exploration program in place; (iii) may require time to mature; and (iv) offer potential for future growth. It is anticipated that the Resource Issuers will include a significant number of junior Resource Issuers.

The Investment Advisor will manage the investment portfolio so as to achieve capital appreciation of the Fund's investments. This continuing investment management program may involve the divestiture of shares and other investments and the reinvestment of the net proceeds from such dispositions in securities of Resource Issuers, as well as other issuers in the oil and gas, mining, pulp and paper, and forestry industries, energy producers and related resource business issuers, such as pipeline or service companies and utilities. All investments will be made in accordance with the Fund's investment policies and restrictions described herein.

The Front Street Resource Fund's portfolio will consist primarily of investments which generate capital gains, but will also include investments which generate income. In managing the portfolio, the Investment Advisor intends to use strategies including: investing in undervalued securities, short selling overvalued securities, managing long/short positions, pairs trading, special warrant arbitrage, merger arbitrage, convertible arbitrage and participation in restructurings.

From time to time the Fund may invest in other mutual funds and may purchase securities of, or enter into specified derivative transactions for which the underlying interest is based on the securities of other mutual funds. Such investments may be entered into in conjunction with other strategies and investments in a manner considered most appropriate to achieving the Fund's investment objectives stated above and enhancing returns as permitted by securities regulations.

RISK

Most of the Fund's assets will be invested in common shares and other equity securities. The Fund will therefore be subject to stock market risk. The Fund may also invest in foreign securities that may expose the Fund, to a limited extent, to the risk of investments in foreign securities and foreign currency risk. The Fund may invest in relatively illiquid securities that may expose the Fund to liquidity risk. The Fund may also be exposed to sector risk due to its investments being concentrated in a limited number of sectors. The Fund may also be exposed to the risks of selling securities short, the risks of investing in derivatives, and the risk associated with investing in securities of junior industrial, technology and natural resource companies.

Currency risk proved to have an effect on the Fund's returns, as the Canadian dollar traded in a wide range relative to the U.S. dollar, over the year. Currency risk impacted principally the Fund's investments that had revenue in U.S. dollars. Volatility in currency markets continues to be high, suggesting uncertainty going forward on this front.

Equity risk also affected Fund volatility. Market volatility was very high this year, as a sharp recovery in commodity prices and early signs of a global recovery positively affected Canadian equity markets.

Interest-rate risk was also a factor, as global central banks and bond and equity markets closely monitored the U.S. Federal Reserve's monetary policy activities and public communications for indications as to interest rate policy.

Credit risk was another factor this past year. In the aftermath of the credit crisis banks are only now starting to lend, but with much higher fees attached. Many companies which are relying on debt to finance expansions have had to halt plans as the funds are not currently available. Government measures to stimulate bank lending have been met with mixed success to date.

The Fund has multiple risks associated with equity markets. Investors whose primary concern is preservation of capital should not be invested in this Fund. The Fund is suitable for investors seeking long-term growth with a tolerance for risk and volatility and a long-term investment horizon.

The risks of investing in the Fund are further discussed in the Fund's Annual Information Form.

RESULTS OF OPERATIONS

Through 2009 and early 2010 the Fund benefited from a recovery in resource markets throughout this year. Oil and base metal stocks, in particular, performed strongly as commodities rose on buying out of China, economic stimulus programs, and early signs of an economic recovery elsewhere in the world. The price of gold rose to an all time high as investors bought the metal as protection against inflation, as well as for a store of value against falling currencies and rising national debt levels.

Those companies that have strong balance sheets are starting to buy assets at compelling valuations. The Fund is long the group, focusing on companies with strong balance sheets or strategic assets, whose values now will look very attractive when the world comes out of its economic slowdown.

RECENT DEVELOPMENTS

After the Fund's year end, equity and commodity markets were quite weak during May 2010. Fears of a double dip recession caused by sovereign debt problems in Greece and worries about a slowdown in China caused this sell off. This volatility may continue through the summer as debt problems in other European countries appear.

On November 24, 2009, the shareholders of the Fund approved the special resolutions to authorize the amalgamation of Front Street Mutual Funds Limited with Front Street Special Opportunities Canadian Fund, another mutual fund corporation managed by Front Street Capital 2004. The effective date of the amalgamation was the close of business on December 1, 2009. The merger was accomplished by the amalgamation of these two mutual fund corporations under the Canada Business Corporations Act (Canada). Upon amalgamation, Front Street Mutual Funds Limited was considered to be continuing Fund for securities regulatory purposes. A new class of shares of Front Street Mutual Funds Limited was created, being the Front Street Special Opportunities Canadian Fund.

Ontario sales tax and GST harmonization

Effective July 1, 2010, Ontario provincial sales tax will be harmonized with the federal goods and services tax ("GST"), resulting in a federally administered tax of 13%. Management fees and other service fees charged to the Fund are currently not subject to Ontario Retail Sales Tax ("ORST"). Under Ontario's proposed harmonization with the GST, these services will be subject to an additional tax of 8%. This proposal is expected to have an effect on investment funds. Such funds will not be entitled to recover this additional cost, as they are not currently able to recover the 5% GST.

International Financial Reporting Standards ("IFRS")

Effective for its fiscal year commencing November 1, 2011, the Fund must adopt IFRS. In preparation thereof, the Manager continues to monitor and implement the Fund's changeover plan and will continue to assess the impact of the implementation as new IFRS guidance become available from the International Accounting Standards Board.

The Manager has reviewed the current IFRS against the Fund's current accounting policies and financial statement presentation under Canadian generally accepted accounting principles ("Canadian GAAP"), and does not expect the adoption of IFRS will have a material effect on the Fund's net asset value per share for all series of shares. The primary impact of IFRS on accounting policies and implementation decisions will be on the financial statement presentation and note disclosures in the Fund's financial statements. In particular, the Fund will be required to present a statement of shareholders' equity and a statement of cash flows, and will be required to include certain additional and enhanced disclosures.

The Fund's changeover plan includes key activities in (a) preparation of financial statements, (b) information processing and record-keeping, (c) business policy assessment and (d) systems and controls. Based on the Manager's preliminary analysis, the Manager believes the changeover to IFRS will not materially affect the Fund's existing business arrangements.

RELATED-PARTY TRANSACTIONS

Management fees of \$806,912 (2009 - \$462,704) were paid to the Manager during the period. Performance fees of \$412,584 (2009 - \$Nil) were incurred with the Manager during the period. Included in accrued expenses are \$238,925 (2009 - \$203,148) of management fees payable to the Manager. Performance fees payable reflects performance fees of \$Nil (2009 - \$Nil) payable to the Manager.

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of the Investment Advisor provided it determines that these affiliates' trade execution abilities and costs are comparable to those non affiliated, qualified brokerage firms, on an execution only basis. During the period ended April 30, 2010, Tuscarora Capital Inc, a company under common control to the Manager, received \$33,570 (2009 - \$Nil) in commissions on portfolio transactions for the Fund.

Management fees and performance fees are measured at the exchange amount of consideration prescribed by the offering documents of the Fund. When related parties enter shareholder transactions with the Fund, the exchange amount of consideration is the transactional NAV available to all other shareholders on the trade date. In the case of brokerage commissions, the exchange amount of consideration is that which is negotiated by the related parties.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past financial year. MANAGEMENT & PERFORMANCE FEES

The Fund pays the Manager a monthly fee equal to one-twelfth of 1.5% of net asset value of the applicable series of the Fund, payable monthly in arrears, calculated without regard to any accrual of performance bonuses (as described below) and before payment of such fee.

The Manager may earn an annual performance bonus (a “Performance Bonus”) in each fiscal quarter if the percentage gain in the new asset value of a series of the Fund (as adjusted for any prior return deficiencies) over the preceding calendar quarter or quarters since a performance fee was last payable exceeds the percentage gain or loss of the benchmark (the ‘Benchmark’) over the same period. The Benchmark for the Fund is calculated as follows:

- 25% of the percentage gain or loss of the S&P/TSX Capped Gold Index
- + 25% of the percentage gain or loss of the S&P/TSX Paper & Forest Products Index
- + 25% of the percentage gain or loss of the S&P/TSX Diversified Materials Index
- + 25% of the percentage gain or loss of the S&P/TSX Diversified Energy Index

The fee will be equal to this excess return per security multiplied by the number of securities outstanding at the end of the quarter multiplied by 20%, provided that the net asset value per security of the Fund (including distributions) is greater than all previous values at the end of each previous calendar quarter. The starting reference point for the next calendar quarter’s calculation will be based on the higher of either the Benchmark performance adjusted net asset value per security or the adjusted actual net asset value per security, both with respect to the previous quarter in which a performance fee was payable.

DEALER COMPENSATION

Brokers, dealers and advisors may be paid a “trailer commission” for assets that their sales representatives place in the Series A and Series B Fund securities. The Fund may, at its discretion, negotiate, change the terms and conditions of, or discontinue the trailer commission with brokers, dealers and advisors.

The trailer commission is calculated as a percentage of assets each broker, dealer or advisor has placed in the Fund series. The trailer commission is calculated based on the closing balance of client accounts for each calendar month. The trailer commission will not be paid if the assets are removed from the Funds. Trailer commissions are paid quarterly at rates set within ranges according to the following table.

Series	Trailer Annual Rate	Annual Payment per \$1,000 of Fund securities held
A	1.00%	\$10.00
B	1.00%	\$10.00
F	0.00%	Nil

NOTES TO THE FINANCIAL STATEMENTS
APRIL 30, 2010

1. **THE FUND** (Continued...)

On November 24, 2009 the shareholders of Front Street Mutual Funds Limited (the "Corporation") approved the special resolutions to authorize the amalgamation of the corporation with Front Street Special Opportunities Canadian Fund Ltd., another mutual fund corporation managed by Front Street Capital 2004. The effective date of the amalgamation was the close of business on December 1, 2009. The merger was accomplished by the amalgamation of these two mutual fund corporations under the Canada Business Corporations Act (Canada).

Upon amalgamation, Front Street Mutual Funds Limited was considered to be the continuing Fund for securities regulatory purposes. A new class of shares of Front Street Mutual Funds Limited was created, namely Front Street Special Opportunities Canadian Fund (of which Series A, B, F, X and Y shares were created). Existing shareholders of the Series A, Series B and Series F of Front Street Special Opportunities Canadian Fund Ltd. received Series X, Series Y and Series F shares respectively of the Front Street Special Opportunities Canadian Fund class of shares of Front Street Mutual Funds Limited.

On December 10, 2009, the Fund acquired Brompton 2008 Flow-Through LP on a tax deferred rollover basis whereby the Partnership units were converted at the rate of 1.451704 Series B shares of the Fund on each Partnership unit. The Partnership had net assets representing shareholders' equity of \$3,814,006 as at December 10, 2009. The Fund issued 430,882 Series B shares for \$3,814,006.

On February 4, 2010, the Fund acquired the net assets of Front Street Flow Through 2008-I Limited Partnership on a tax deferred rollover basis whereby the Partnership units were converted at the rate of 2.385013 Series B shares of the Fund for each Partnership unit.

The foregoing financial statements and accompanying notes to the financial statements presented herein are for the Fund. Separate financial statements of each of the other classes of shares of the Corporation have also been prepared as at April 30, 2010.

Front Street Capital 2004 is the manager of the Fund (the "Manager"). Front Street Investment Management Inc. (the "Investment Advisor") has been retained by the Manager, on behalf of the Fund, to provide investment advisory and portfolio management services to the Fund. RBC Dominion Securities Inc. is the custodian. Citigroup Fund Services Canada, Inc. provides fund accounting services and shareholder recordkeeping services.

The Fund's investment objective is to maximize capital appreciation by investing in small and medium-sized business entities in a range of natural resource sector industries, including base and precious metals, mineral exploration, and in energy-related industries. The Investment Advisor will assist the Fund in selecting investments primarily in equity and equity-related securities, although the Fund may also invest in other securities, including preferred shares, of such resource issuers, including junior resource issuers, in accordance with the investment strategies and guidelines. Such investments may include short selling of securities which the Investment Advisor believes are overvalued.

NOTES TO THE FINANCIAL STATEMENTS

2. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). The following is a summary of the significant accounting policies followed by the Fund:

a) Financial instruments

Investments, at fair value are classified as held for trading. Accounts receivable relating to shares issued, amounts receivable relating to accrued income, other receivable and accounts receivable relating to portfolio assets sold are classified as loans and receivables. Accrued expenses, accounts payable relating to shares redeemed, performance fees payable and liabilities for portfolio assets purchased are classified as other financial liabilities.

Financial instruments which are traded in active markets are measured based on the bid price for long securities and the ask price for short securities. Transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities are charged to net income in the period. The cost of individual investments in the Statement of Investment Portfolio are recorded at total cost including transaction costs.

In June 2008, the Canadian Securities Administrators adopted changes to National Instrument 81-106 on Investment Fund Continuous Disclosure. These changes are essentially aimed at modifying the requirements pertaining to the calculation of the unit value due to the inclusion of Section 3855, Financial Instruments - Recognition and Measurement of the CICA Handbook. These changes allow the Fund to report two distinct net asset values: one for the financial statements, which is calculated in accordance with Canadian GAAP (called "net assets") and another for all other purposes, such as unit pricing (called "net asset value"). A reconciliation between the net assets per unit and the net asset value per unit is required (see note 8) as well as description of the differences between the valuation principles and practices used by the Manager to calculate the net asset value and those prescribed by Canadian GAAP. The changes are effective September 8, 2008 and have been reflected in these financial statements.

b) Valuation of investments

i) Investments listed on an exchange are valued at the last bid price reported by the principal securities exchange on which the issue is traded on the financial statement date. The difference between this amount and cost is shown as the change in the unrealized appreciation (depreciation) of the value of investments. For investments that are not traded in an active market, Section 3855 requires the use of specific valuation techniques to be used in the determination of fair value. When current market prices or quotations are not readily available, valuations are established using specific procedures in order to estimate what the fair value would be, in an arms length transaction, motivated by normal business considerations. Valuation techniques principally include the use of the last publicly traded price, the issuance price of securities at the date of the most recent financing of the entity or a price established by the Manager in accordance with its fair value policy.

ii) Investments which are restricted as to transferability are valued at the fair value of the unrestricted investment as provided in paragraph (i) above less a discount of 2% per month up to four months.

The process of valuing investments for which no published market exists is inevitably based on inherent uncertainties and the resulting values may differ from values that would have been established had a ready market existed for these investments.

2. **SIGNIFICANT ACCOUNTING POLICIES** (Continued...)

b) Valuation of investments (continued...)

- iii) Trust units are valued at the last bid price reported by the principal securities exchange on which the issue is traded on the financial statement date. The cost of the trust units is reduced on an annual basis by distributions from the trust and increased by the annual income allocated to the units by the trust.
- iv) Investments in mutual funds or pooled funds are valued based on the net asset value per unit at the close of trading on the financial statement date.
- v) The Fund values its investments in limited partnerships at the last bid price reported by the principal securities exchange on which the issue is traded on the financial statement date. The Fund calculates the cost value of its investment in limited partnerships using the equity method. Under this method, the limited partnership investments are recorded at cost plus the Fund's pro rata share in undistributed earnings since acquisition.
- vi) The Fund may make short sales whereby a security that it does not own is sold in anticipation of a decline in the fair value of the security. Securities which are sold short are valued at the last ask price reported by the principal securities exchange on which the issue is traded on the financial statement date. To enter a short sale, the Fund may need to borrow the security for delivery to the buyer.

While the transaction is open, the Fund will also incur a liability for any paid dividends or interest which are due to the lender of the security.

c) Financial instruments disclosure and presentation and fair value measurements

The Fund has adopted CICA Handbook Sections 3862, Financial Instruments - Disclosures and 3863, Financial Instruments - Presentation, which have replaced Section 3861, Financial Instruments - Disclosure and Presentation. These new standards place increased emphasis on disclosures with respect to the nature and extent of risks arising from financial instruments and how the Fund has managed those risks. See note 9 for additional details.

2. **SIGNIFICANT ACCOUNTING POLICIES** (Continued...)

c) Financial instruments disclosure and presentation and fair value measurements (continued...)

The Fund adopted the amendments to CICA 3862, Financial Instruments – Disclosures on January 1, 2009. CICA 3862 establishes a three-tier hierarchy as a framework for disclosing fair value based on the inputs used to value the Fund's investments. The hierarchy of inputs is summarized below:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (Level 2); and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

See Note 11 for additional details.

These changes have no impact on the net assets, results of operations or changes in net assets of the Fund.

d) Transaction costs

Portfolio transaction costs are expensed and are included in "Transaction costs" in the Statements of Operations. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges. The individual security's cost shown on the Statement of Investment Portfolio includes only those transaction costs incurred on the acquisition of portfolio investments.

e) Cash and cash equivalents

Cash and cash equivalents consist of cash balances with banks and highly liquid short-term investments with original terms to maturity of less than three months.

f) Investment transactions and income recognition

Investment transactions are accounted for on a trade date basis. Gains and losses from such transactions are calculated using the weighted average cost of the securities on disposition.

Interest income is recorded on an accrual basis. Dividend income is recorded on the ex dividend date.

2. **SIGNIFICANT ACCOUNTING POLICIES** (Continued...)

g) Foreign currency translation

Income, expenses and investment transactions in foreign currencies are translated into Canadian dollars at the rate of exchange prevailing on the dates of such transactions. Assets and liabilities in foreign currencies are translated into Canadian dollars at the closing exchange rates on each valuation day.

h) Net increase (decrease) in net assets from operations per share

Net increase (decrease) in net assets from operations per share are based on the increase (decrease) in net assets from operations attributable to each series of shares divided by the average number of shares outstanding of that series during the period.

i) Net assets per share

The net assets per share is calculated by dividing the net assets of a series of shares by the total number of shares of the series outstanding at the end of the period.

j) Capital disclosures

The Fund has adopted CICA Handbook Section 1535, Capital Disclosures, which requires disclosure of an entity's objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital and whether the entity has complied with any capital requirements and, if it has not complied, the consequences of such non-compliance. See note 10 for additional details.

k) General standards on financial statement presentation

CICA Handbook Section 1400, General Standards on Financial Statement Presentation, has been amended to include requirements to assess and disclose an entity's ability to continue as a going concern. The Manager of the Fund has made this assessment and concluded that there are currently no material uncertainties that cast doubt on the Fund's ability to continue as a going concern.

l) Estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires the Manager to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

2. **SIGNIFICANT ACCOUNTING POLICIES** (Continued...)

m) Future accounting pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, which have a potential implication for the Fund, are as follows:

International financial reporting standards ("IFRS")

Effective for its fiscal year commencing November 1, 2011, the Fund must adopt IFRS. In preparation thereof, the Manager continues to monitor and implement the Fund's changeover plan and will continue to assess the impact of the implementation as new IFRS guidance become available from the International Accounting Standards Board.

The Manager has reviewed the current IFRS against the Fund's current accounting policies and financial statement presentation under Canadian generally accepted accounting principles ("Canadian GAAP"), and does not expect the adoption of IFRS will have a material effect on the Fund's net asset value per share for all series of shares. The primary impact of IFRS on accounting policies and implementation decisions will be on the financial statement presentation and note disclosures in the Fund's financial statements. In particular, the Fund will be required to present a statement of shareholders' equity and a statement of cash flows, and will be required to include certain additional and enhanced disclosures.

The Fund's changeover plan includes key activities in (a) preparation of financial statements, (b) information processing and record-keeping, (c) business policy assessment and (d) systems and controls. Based on the Manager's preliminary analysis, the Manager believes the changeover to IFRS will not materially affect the Fund's existing business arrangements.

3. **SHARES ISSUED AND OUTSTANDING**

The authorized capital of the Fund consists of an unlimited number of mutual fund shares, available in three series. Redemption and commission fees vary according to each series of shares as follows:

Series A shares

Redemption fees payable to the Manager may be applicable upon the sale of shares of this series based on the original cost amount and the time to disposition. A redemption fee of 3% applies to shares of this series sold within the first 18 months following acquisition. A redemption fee of 2% applies to shares of this series sold after the first 18 months and prior to 36 months following acquisition. No redemption fee applies to shares of this series sold after the first 36 months following acquisition.

3. **SHARES ISSUED AND OUTSTANDING** (Continued...)

Series B shares

Commission fees payable to brokers, dealers or advisors may be applicable upon the purchase of shares of this series up to 5% of the gross purchase amount, at the discretion of the broker, dealer or advisor.

Series F shares

No redemption or commission fees are applicable to shares of this series.

The Fund allocates income and expenses, and realized and unrealized capital gains and losses to each class of shares outstanding based on the average class allocation for the period.

The following share transactions took place during the period:

	2010	2009
Shares outstanding, beginning of the period:

4. FEES AND EXPENSES

The Fund pays a monthly management fee equal to 1/12 of 1.5 % of the net asset value of the Fund calculated and paid at the end of each month in arrears from each Fund series.

The Fund pays a monthly service fee of 1/12 of 1% of the net asset value of the Series A and Series B shares calculated and paid at the end of each month in arrears.

The Fund is responsible for payment of all operating and administrative expenses of the Fund. The main components of these expenses are legal and accounting fees, printing expenses, reporting issuer filing and sustaining fees, custodial fees, fees payable to, and expenses incurred by, the Fund's Independent Review Committee and expenses of making distributions to shareholders. As the Fund has more than one series of shares, the shareholders of each series bear their pro rata share of those expenses which are common to the operation of all series, as well as those expenses which are attributable solely to that series.

The Fund pays a performance fee if the percentage gain in the net asset value of a series of the Fund (as adjusted for any prior return deficiencies) over the preceding fiscal quarter or quarters since a performance fee was last payable exceeds the percentage gain or loss of the benchmark (the "Benchmark") over the same period. The Benchmark for the Fund is calculated as follows: 25% of the percentage gain or loss of the S&P/TSX Capped Gold Index plus 25% of the percentage gain or loss of the S&P/TSX Paper & Forest Products Index plus 25% of the percentage gain or loss of the S&P/TSX Diversified Materials Index plus 25% of the percentage gain or loss of the S&P/TSX Diversified Energy Index. The fee is equal to this excess return per share multiplied by the number of shares outstanding at the end of the quarter multiplied by 20%, provided that the net asset value per share of the Fund (including distributions) is greater than all previous values at the end of each previous fiscal quarter. The starting reference point for the next fiscal quarter's calculation will be based on the higher of either the Benchmark performance adjusted net asset value per share or the adjusted actual net asset value per share, both with respect to the previous quarter in which a performance fee was payable.

5. INCOME TAX AND DISTRIBUTION

The Fund qualifies as a mutual fund corporation under the Income Tax Act (Canada). The Corporation will earn three types of income, Canadian dividends, taxable capital gains and other net taxable income. The income of the Fund, including taxable capital gains, will be subject to tax at applicable corporate tax rates, after claiming allowable deductions for expenses and applicable credits for foreign taxes paid on foreign source income. Income tax on capital gains is refundable to the Fund to the extent that such gains are distributed to shareholders as capital gains dividends or the Fund's shares are redeemed. Gains and losses realized by the Fund in relation to certain derivative transactions and short sale transactions may be taxed on account of income as opposed to on account of capital. Other income is subject to tax at normal corporate rates and is not subject to refundable tax treatment.

FRONT STREET RESOURCE FUND
(Formerly Front Street Resource Fund Class)

NOTES TO THE FINANCIAL STATEMENTS
APRIL 30, 2010

5. INCOME TAX AND DISTRIBUTION (Continued...)

The Fund may elect in the prescribed manner and form in order to have the dividends it distributes treated as capital gains dividends to the extent that the dividends do not exceed the Fund's capital gains dividend account. The capital gains dividend account will be represented by the amount by which capital gains realized by the Fund while it was a mutual fund corporation exceed the aggregate of:

- (a) capital losses realized by the Fund while it was a mutual fund corporation;
- (b) certain capital gains dividends previously paid by it; and
- (c) amounts in respect of which the Fund received capital gains tax refunds.

The Fund anticipates that gains and losses realized on the disposition of investments will normally give rise to capital gains not ordinary income. The Fund intends to declare sufficient capital gains dividends so that it is entitled to a refund of the full amount of tax paid or payable on their capital gains. The suspended loss rules in the Income Tax Act (Canada) may prevent the Fund from recognizing capital losses on the disposition of securities in certain circumstances, which may increase the amount of capital gains dividends that the Fund must pay to Fund shareholders.

If allowable capital losses exceed taxable capital gains of the Fund in any taxation year, the excess cannot be allocated to shareholders, but may be carried back three years and carried forward indefinitely and be applied against taxable capital gains in such previous or subsequent years.

The Fund will allocate taxes payable and recoverable of the Fund to each of the classes. The Fund can pay ordinary taxable dividends or capital gains dividends to shareholders of any class in order to receive a refund of taxes on Canadian dividends or capital gains taxes. The Fund intends to pay out such dividends so as to maximize tax refunds and minimize taxes payable at the corporate level.

The Fund may be subject to provincial capital taxes.

The corporation's shares are qualified investments for registered plans.

6. TRANSACTION COSTS

The total brokerage commissions paid by the Fund with respect to security transactions for the period ended April 30, 2010 was \$249,889 (2009 - \$130,746).

FRONT STREET RESOURCE FUND
(Formerly Front Street Resource Fund Class)

NOTES TO THE FINANCIAL STATEMENTS
APRIL 30, 2010

7. RELATED PARTY TRANSACTIONS

Management fees of \$806,912 (2009 - \$462,704) were paid to the Manager during the period (see note 4). Performance fees of \$412,584 (2009 - \$Nil) were incurred with the Manager during the period (see note 4). Included in accrued expenses are \$238,925 (2009 - \$203,148) of management fees payable to the Manager. Performance fees payable reflects performance fees of \$Nil (2009 - \$Nil) payable to the Manager.

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of the Investment Advisor provided it determines that these affiliates' trade execution abilities and costs are comparable to those non affiliated, qualified brokerage firms, on an execution only basis. During the period ended April 30, 2010, Tuscarora Capital Inc, a company under common control to the Manager, received \$33,570 (2009 - \$Nil) in commissions on portfolio transactions for the Fund.

Management fees and performance fees are measured at the exchange amount of consideration prescribed by the offering documents of the Fund. When related parties enter shareholder transactions with the Fund, the exchange amount of consideration is the transactional NAV available to all other shareholders on the trade date. In the case of brokerage commissions, the exchange amount of consideration is that which is negotiated by the related parties.

8. RECONCILIATION OF NET ASSET VALUE TO NET ASSETS FOR FINANCIAL STATEMENTS

In accordance with the decision made by the Canadian securities regulatory authorities, a reconciliation between the transactional net asset value ("NAV") and net assets calculated using generally accepted accounting policies ("GAAP NA") of an investment fund is required for financial reporting periods ending on or after October 31, 2007. For investments that are traded in an active market where quoted prices are readily and regularly available, Section 3855 requires bid prices (for investments held) and ask prices (for investments sold) to be used in the fair valuation of investments, rather than the use of closing trade prices currently used for the purpose of determining transactional NAV. For investments that are not traded in an active market, Section 3855 requires the use of specific valuation techniques (see note 2) rather than the use of valuation techniques in of general practice in the investment funds industry.

8. **RECONCILIATION OF NET ASSET VALUE TO NET ASSETS FOR FINANCIAL STATEMENTS** (Continued...)

These changes account for the difference between transactional NAV and GAAP NA. The impact of the adoption of Section 3855 on the net asset value of the Fund is as follows:

As at April 30, 2010

	<u>Net Asset Value</u>			<u>Net Assets per Share</u>

NOTES TO THE FINANCIAL STATEMENTS

9. **FINANCIAL INSTRUMENTS** (Continued...)

The Fund's financial instruments consist of investments at fair value, cash and cash equivalents, accounts receivable relating to shares issued, amounts receivable relating to accrued income, other receivable accounts receivable relating to portfolio assets sold, accrued expenses, accounts payable relating to shares redeemed, performance fees payable and liabilities for portfolio assets purchased. It is the Manager's opinion that due to the short term nature of these financial instruments, the Fund is not exposed to significant market price, currency, interest rate, liquidity, cash flow and credit risks arising from these financial instruments except as described below. The fair value of these financial instruments approximate their carrying values, unless otherwise noted.

Risk Management

The Investment Advisor seeks to minimize potential adverse effects of these risks on the Fund's performance by employing professional, experienced portfolio advisors, by daily monitoring of the Fund's positions and market events, and by diversifying the investment portfolio within the constraints of the investment objective. To assist in managing risk, the Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment strategy and securities regulations.

The Fund's investment activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. The Statement of Investment Portfolio presents the securities held by the Fund as at April 30, 2010, and groups the securities by asset type, sector and/or market segment. Significant risks that are relevant to the Fund are discussed below.

i) **Market price risk**

Market price risk, is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market.

The Fund is exposed to market price risk arising from its investments in securities. The Investment Advisor manages the Fund's market price risk on a daily basis in accordance with the Fund's investment objective and policies.

ii) **Currency risk**

The Fund may invest in financial instruments denominated in currencies other than its measurement currency. Consequently, the Fund is exposed to risks that the exchange rate of its currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of the Fund's assets or liabilities denominated in currencies other than Canadian dollars, absent any changes in market prices or investment specific events.

ii) Currency risk (continued...)

Included in the undernoted accounts are the following foreign currency balances:

Currency	Investments, at fair value	Cash	Foreign exchange contracts	Total	Percentage of GAAP NA
Australian Dollar	\$ 17,894,730	\$ 4	\$ -	\$ 17,894,735	14.65%

iii) Interest rate risk

The Fund may invest in fixed and floating rate securities. The income of the Fund may be affected by changes to interest rates relevant to particular securities or as a result of management being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed interest securities may be affected by interest rate movements or the expectation of such movement in the future. Interest payable on bank overdraft or broker margin account positions will be affected by fluctuations in interest rates. As at April 30, 2010, the bulk of the Fund's investments are substantially non-interest bearing equity investments and its exposure to interest rate changes is minimal.

iv) Liquidity risk

Liquidity risk is the risk the Fund will encounter difficulty in meeting obligations associated with financial liabilities. Shareholder redemption requests are the main liquidity risk for the Fund.

The Fund maintains sufficient cash and marketable securities, and manages liquidity risk through its ability to close out market positions.

Certain of the Fund's investments are in private securities which are thinly traded. As at April 30, 2010, the fair value of such assets was 11.02% of the total net assets.

v) Cash flow risk

The risk that future cash flows associated with a monetary financial instrument will fluctuate in amount. In the case of a floating rate debt instrument, for example, such fluctuations could result from a change in the effective interest rate of the financial instrument, usually without a corresponding change in its fair value.

9. **FINANCIAL INSTRUMENTS** (Continued...)

vi) Credit risk

The Fund is exposed to credit risk arising from its transactions with its counterparties and brokers, related to securities purchases and sales. Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

Financial assets which potentially expose the Fund to credit risk consist principally of investments in bonds and amounts due from brokers. The Fund seeks to mitigate its exposure to credit risk by placing its cash, and transacting its securities activity with large financial institutions. The Fund may also invest in corporate bonds. Until the bonds are sold or mature, the Fund is exposed to credit risk relating to whether the bond issuer will meet its obligations when they come due. The extent of the Fund's exposure to credit risk in respect of these financial assets is reflected in their carrying value as recorded in the Fund's Statement of Net Assets.

As at April 30, 2010, the Fund had no significant investments in long term debt instruments.

10. **CAPITAL MANAGEMENT**

The Manager considers the Fund's capital to consist of the issued ordinary share capital and the net assets attributable to participating shareholders.

The Manager manages the capital of the Fund in accordance with the Fund's investment objectives, policies and restrictions, as outlined in the Fund's prospectus, while maintaining sufficient liquidity to meet participating shareholder redemptions. The Fund's overall strategy for managing capital remains unchanged from 2009.

The Fund does not have any externally imposed capital requirements.
